SUMMARY

Staff Software Engineer with 10+ years of experience building high-scale distributed systems and leading cross-functional technical initiatives. Expert in TypeScript, Node.js, React, and cloud-native architectures (AWS, Kubernetes, Terraform). Led platform-wide reliability improvements serving millions of users, drove architectural decisions that reduced infrastructure costs by 40%, and mentored engineers across multiple teams. Proven track record of shipping complex systems from design through production while aligning technical strategy with business outcomes.

SKILLS

Languages: TypeScript, JavaScript (ES2024), Python, SQL, PHP, HTML, CSS

Frameworks: React, Next.js, Node.js, Express, Fastify, tRPC, Web Components, Ionic

Databases: PostgreSQL, MySQL, Redis, DynamoDB, MongoDB, Firebase

Cloud & Infrastructure: AWS (ECS, Lambda, RDS, S3, CloudFront, SQS, SSM, CloudWatch), Docker, Kubernetes, Terraform, Infrastructure-as-Code (IaC)

Testing: Jest, Testing Library, Cypress, Playwright, Test-Driven Development (TDD), Behavior-Driven Development (BDD)

CI/CD: GitHub Actions, CircleCI, Jenkins, Continuous Integration / Continuous Delivery

Architecture: Microservices, Event-Driven Architecture, Domain-Driven Design, REST APIs, GraphQL, Clean Architecture

Practices: System Design, Technical Leadership, Code Review, Mentorship, RFC/ADR Authorship, Agile/Scrum

PROFESSIONAL EXPERIENCE

• Hona

Remote

Staff Software Engineer

Aug 2024 – Present

- Architected and led implementation of voice AI platform infrastructure using TypeScript, Node.js, and AWS, enabling automated customer communications that reduced manual call handling by 60%.
- Designed event-driven architecture using tRPC and PostgreSQL that processes 100K+ daily events with 99.9% reliability, improving system observability and debugging capabilities.
- Led cross-team initiative to establish engineering standards and code review practices adopted by 15+ engineers across 3 product teams.
- Drove technical roadmap alignment with Product and Design, authoring RFCs that defined platform-wide patterns for API versioning and error handling.
- Mentored 4 engineers on system design and distributed systems concepts, accelerating their technical growth and ownership of critical services.

• Route

Remote

Staff Software Engineer

Feb 2024 – Jul 2024

- Spearheaded revenue optimization initiatives that increased platform revenue by 20%, directly contributing to successful \$40M Series C funding round.
- Architected scalable front-end platform using React and Web Components, deployed across Shopify, BigCommerce, WooCommerce, and Amazon integrations serving 2M+ merchants.
- Designed and implemented microservices architecture managing AWS ECS, RDS, DynamoDB, Redis, SQS, and CloudFront through Terraform IaC, reducing deployment time by 70%.
- Led adoption of TDD/BDD testing frameworks (Jest, Cypress, Testing Library) across 4 engineering teams, improving code coverage from 45% to 85% and reducing production incidents by 40%.
- Established CI/CD pipeline standards using GitHub Actions and Docker that reduced release cycles from 2 weeks to continuous delivery.

Senior Software Engineer

Sep 2021 – Feb 2024

- Designed and built insurance widget architecture in React deployed across 50K+ merchant storefronts, processing \$10M+ monthly in package protection premiums.

- Implemented e-commerce platform integrations (Shopify, BigCommerce, WooCommerce, Magento) that expanded merchant adoption by 150% year-over-year.
 - Authored technical specifications and architecture documentation that became the reference standard for new service development.
 - Mentored 6 engineers on front-end architecture and testing best practices; 2 promoted to senior roles within 18 months.
- **ThoughtLab** Remote
Software Engineer *Mar 2019 – Aug 2019*
 - Developed custom WordPress themes and WooCommerce plugins from scratch, reducing client time-to-market by 50% through reusable component architecture.
 - Implemented payment gateway integrations for WooCommerce that processed \$500K+ in monthly transactions with 99.9% uptime.
 - Maintained and enhanced mobile applications built with Ionic and Firebase, supporting 10K+ active users.
 - **A Figueira** Rio de Janeiro, Brazil
Software Engineer *Mar 2016 – Mar 2017*
 - Developed cross-platform mobile app using Ionic framework, achieving 100K+ downloads and 4.5-star rating on app stores.
 - Built custom WordPress themes and plugins, improving site performance by 40% through code optimization.
 - **Lar Fabiano de Cristo** Rio de Janeiro, Brazil
Junior Software Developer *Aug 2012 – Feb 2016*
 - Developed and maintained internal web applications that streamlined organizational workflows, reducing administrative processing time by 30%.

EDUCATION

- **PUC-Rio – Pontifícia Universidade Católica do Rio de Janeiro** Rio de Janeiro, Brazil
Postgraduate Degree in Computer Software Engineering *Jan 2023 – Jan 2024*
- **Universidade Estácio de Sá** Rio de Janeiro, Brazil
Bachelor of Computer Information Systems *2012 – 2016*
